SCHOOL MEAL PRE-ORDER SOFTWARE

Ordering School Meals Has Never Been Easier.

Vanco's Pre-Order Software is convenient for parents, easy for schools and efficient for food service providers. Create menus in advance, post them to the parent portal in MySchoolAccount, set order deadlines and let Vanco do the rest!

Parents can log on to their student's account to view the menu calendar, make healthy choices for their students and make payments all in one place. No need for students to carry cash, their lunch will be ready and waiting!

Food service providers, volunteers and staff will know what's been ordered, how much they need to prepare and which student gets what meal. Our software also enables contactless food service to support schools and families during periods of distance learning.

For Schools

Create your menus through our Administrative portal. Set ordering cutoff dates.

- Create menu calendars
- Support for prepayment
- Set ordering deadlines
- Eliminate paper forms

For Food Service Providers

Completely confidential transactions. More secure than writing a check!

- Minimize waste with accurate ordering and preparation
- Support contactless meal delivery
- Maintain multiple clients in one place
- Easily communicate with parents

For Parents

Log on to your student's account and submit a school lunch pre-order.

- Budget in advance for meal purchases
- 24/7 access
- Control healthy eating patterns
- Print upcoming lunch menus

For Students

Parents can easily go online and check when their next installment is scheduled to pay.

- No cash needed
- A la Carte options still available
- Know what your lunch is every day
- Get your lunch served faster
