SIMPLIFY REGISTRATIONS AND REPORTING WITH REGWERKS

Bring Student Enrollment Online to Save Time

Our registration and payment software eliminates administrative hurdles by helping you process information and fees in one place.

RegWerks will save you time, improve reporting and simplify billing. Here's how.

Custom online registration forms allow you to collect all the information you need, from emergency contacts to t-shirt sizes. Build custom questions with branching logic in a user-friendly platform.

Online parent portals put families' payment information, account details, schedules and tax statements at their fingertips.

Hundreds of flexible, on-demand reports provide important data on attendance, class rosters, finances and more, including a report that compiles all registration data.

Automated enrollment deadlines take the manual work out of processing registrations and setting enrollment windows.
