

MAKE CHILD CARE MANAGEMENT SIMPLE.

As a leader in your school or district's preschool and before and after care programs, we know you have more to handle this year than perhaps any other year. We believe you should be focused on the education, happiness and safety of the kids in your program. Of course, that's difficult to do when you're working across many software tools.

Vanco, in partnership with Smartcare, offers schools and districts a simple software solution built to the evolving needs of school child care programs.

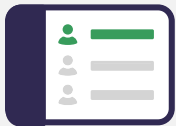

Work Smarter with One Cohesive Platform

No need to work with a patchwork of manual processes, spreadsheets and sporadic systems. Whether you have one location or a dozen, you will have visibility into enrollment, attendance, invoices, payments and more – all in one place.

Support Staff and Student Safety

Manage student/teacher ratios and offer contactless check in and check out. Plus, easily make and adjust schedules for staff, students, and rooms to keep everyone safe, even as school schedules change.

Parent Portal

Keep parents happy. Our smartphone app allows parents to receive billing updates, see their balances, manage payments and receive communications.

Automated Billing

Automated billing and payments can be configured by schedule, tuition plan, discounts, and subsidized plans. Offer split billing, auto-assign late pick up fees, and send billing reminders and updates.

Data & Reporting

Real-time reports on enrollment, regulatory compliance, cost trends and revenue make program management simple. Plus, auto-assigned GL codes depositing to appropriate deposit accounts makes reconciliation a breeze.

Schedule a demo to learn how Vanco Child Care can help your program run simply and efficiently, rather than trying to make different systems work in harmony.
